

YOU help
our clients shape a
positive future

2,954
adults received
clinical services

95,552
adult clinical
services were provided

“After my second DUI, I started services at BHcare. My ongoing treatment consists of weekly one-on-one counseling, two group therapy sessions that meet twice a week and medication management for my bipolar disorder. The support I receive has been a great comfort and stress reliever. My anxiety over facing jail time is nearly gone thanks to the constant communication my clinician has with my probation officer. I’m very proud and happy to say I’ve been sober since August of 2023.”
